California OES Weekly Weather Threat Briefing

November 7, 2017
3:00PM PDT

Day 1: No significant weather or water impacts
expected at this time.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

Prepared by: Leslie Waite-Smith
801-524-7907

Key Points

11/08 – 11/15

Wednesday-Friday

- Light valley rain and moderate mountain precipitation expected. Leaf-clogged drains could result in ponding of water on roadways and minor street flooding in neighborhoods.
- Snow levels will remain high, above most pass levels, but there could still be impacts to travel as roads will be wet and slippery.
- Winds will be strong and gusty at times, as high as 60 mph over highest elevations. Strong winds could down trees and powerlines with prolonged power outages.

Saturday

- Short break in weather systems expected with no new impacts anticipated at this time.

Sunday-Monday

- Another round of valley rain and high elevation snow possible.
- Too early to tell details but confidence is high in another wet system moving through.

California OES Impact Threat Matrix

Nov 8 – 15, 2017

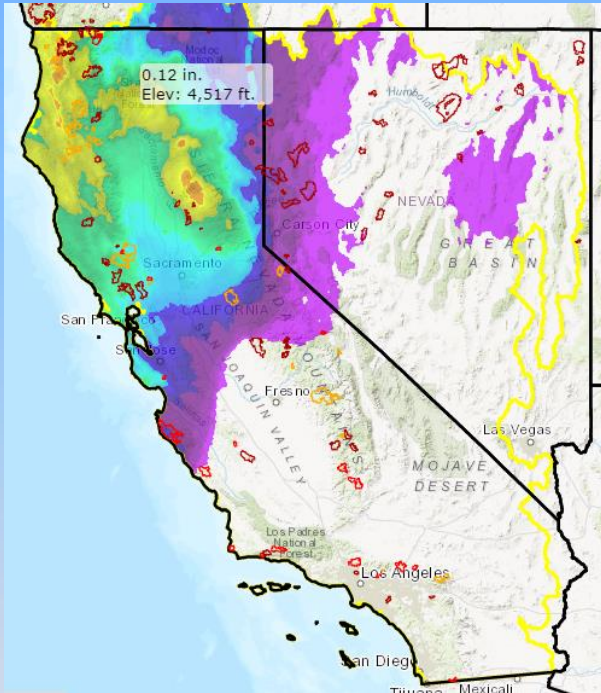

DAY/THREAT	WED	THU	FRI	SAT	SUN	MON	TUE
Fire Weather							
Winds	Nrn half of CA	Nrn half of CA	Nrn half of CA		Nrn half of CA	Nrn half of CA	
Extreme Cold							
Snow	Nrn & Cntrl Sierra	Nrn & Cntrl Sierra	Nrn & Cntrl Sierra		Nrn Sierra	Nrn Sierra	
Heavy Rain/ Flash Flooding	Nrn & Cntrl CA	Nrn and Cntrl CA	Nrn & Cntrl CA		Nrn Sierra	Nrn Sierra	
River Flooding							
Fog							

	High Threat
	Moderate Threat
	Slight Threat
	No Discernible Threat
